GENERAL

what is schaubau?

„schaubau“ is the international summer school that has been taking place in the heart of Dessau the city of Bauhaus since 2018. The design camp is aimed at students, pupils, craftsmen and value creators from all creative disciplines such as design, architecture, fashion and art.

A supporting program ensures a varied, productive, sunny summer week in Dessau.

what is the topic of 2023?

hello future

As designers and part of the last generations who can still do something on this planet (Barrak Obama), we are particularly in demand. Design is not only for toasters and posters, but above all a way of expressing the future.

How do you go into the race? What moves and excites you? Environment, climate, justice, participation? And what does it take? During the workshop week, you will design your personal future symbol and implement it in three different design techniques. You put it on paper as an environmentally friendly risography. You will photograph it as a holographic image in Dessau's urban space (LED Flashstick) and you will slap it on the wall (Mural).

The stimulating supporting program (Bauhaus ...!) and fun chefs (vegan/vegetarian) make for a chill summer week in the province.

Don't forget your laptop!
